

PRODUCT CHANGE

| | |
|-----------------|------------------------------------|
| Change: | New names for SF08 and SF09 |
| PCN-No.: | 1211-01-00 |
| Date: | 05 November 2012 |

| | |
|-------------------------------|-------------------------------|
| Description of Change: | |
| New name for SF08: | perma high speed grease |
| New name for SF09: | perma multipurpose bio grease |

| | |
|------------------------------------|---|
| Details: | |
| Low temperature grease SF08 | Changed to "perma high speed grease". |
| Bio grease SF09 | Changed to "perma multipurpose bio grease". |
| Composition and manufacturers: | No change |
| Reason for the name change: | New name better reflects the special application areas of these greases |
| SF08 perma high speed grease | Synthetic long term grease for a wide service temperature range. It consists of a synthetic base oil and a special calcium soap. Due to its wide service temperature range and high speed value, it is extremely suitable for the lubrication of electric motors, fan- and pump bearings at high speeds. |
| SF09 perma multipurpose bio grease | SF09 is a fully synthetic and rapidly biodegradable special grease. It is very resistant to water, protects against corrosion, has a good load carrying capacity and ageing resistance. Recommended usage: Rolling and sliding bearings, ----- and open gears, gear racks and spindles wherever there is a risk of the lubricant contaminating the soil or water. It is ideal for the lubrication of wood working machines, agricultural and forestry equipment. |
