

Product Change

Modification of perma Protection box double (steel) / perma Protection box single (Steel)

PCN-No.:

1601-01-00

Date:

2016/01/26

Description of Change:

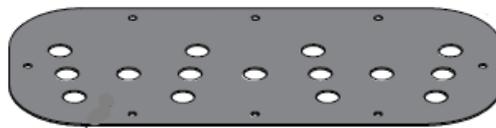

Modification of **perma Protection box double (steel)** and **perma Protection box single (Steel)**.

Protection box double (steel) receives new article number 111153.

Details:

Modification of **perma Protection box double (steel)**:

- Outlet holes for the current version (# 101500) were drilled individually (depending on perma PRO outlets used) or had to be drilled by the customer. The new version (# 111153) will be delivered with the following standard pattern of drilled holes:

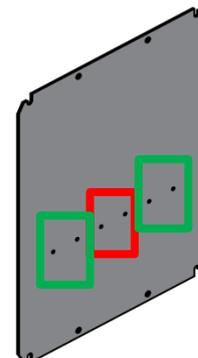

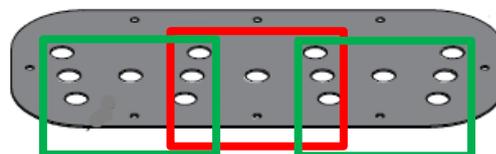

Flange plate
with outlet holes

Mounting plate for perma PRO

The pre-drilled holes make it possible to install one or two perma PRO in the **Protection box double (steel)**:

1. For the installation of one perma PRO:
Use pre-drilled holes marked in red
2. For the installation of two perma PRO:
Use pre-drilled holes marked in green

Modified **perma Protection box double (steel)** and **perma Protection box single (steel)** are equipped with **PA-Locking screw M16x1,5 (#111185)**:

In order to meet protection class IP 66, all outlets that are not being used must be closed with **PA-Locking screw M16x1,5 (#111185)**.

PA-Locking screw substitutes the **Blind plug for perma Protection box PRO (#101505)**.

New: 111185

Old: 101505

perma Protection box double (steel) receives new article number 111153.

The article number for **perma Protection box single (steel)** remains unchanged (#101527).
